

# STERITAS GTI

## Glucocorticoid Toxicity Index

### An essential clinical outcome assessment for measuring steroid-toxicity

The competitive edge you need for approval and adoption of your new steroid-sparing therapeutic rests on quantifying glucocorticoid toxicity in your clinical trial. The Steritas GTI is the only composite clinical outcome assessment (COA) that measures steroid-toxicity directly. The Steritas GTI demonstrates safety and efficacy of steroid-sparing treatments.

The first-in-class COA is available through a digital platform engineered for the fast, accurate, and seamless calculation of steroid scores across several essential health domains.

- Developed by 20 world experts across multiple sub-specialties
- FDA 21 CFR Part 11 enabled Software as a Medical Device (SaMD)
- HIPAA compliant digital platform, cloud-based or on-premise deployment

Reduction in steroid-toxicity as measured by the Steritas GTI constituted the key secondary endpoint in the ADVOCATE trial for the use of avacopan in the treatment of ANCA-associated vasculitis. The drug was granted regulatory approval in the United States, Europe and Japan. The FDA and European Medicines Agency view steroid reduction as a reflection of both efficacy and safety.

**When you license the Steritas GTI you have access to our modern cloud-based technology stack when and where you need it.**

### Our Support Team is at your side.

From the moment you license the Steritas GTI our team becomes part of your team throughout your entire clinical trial.

### Our support

- Introductory meeting with your entire trial team
- Ongoing support with customizable trial materials
- Guidance for translations, e-COA migration, EDC, DDC, and other integrations

### Additional offerings

- Customized training for investigator meetings and trial design consultation
- Digital strategies and engineering support for your data management team
- Global network of immune-mediated and inflammatory disease experts

The Steritas GTI will help demonstrate safety and efficacy of your new steroid-sparing therapy. Our experts will be at your side every step of the way.
